To whom it may concern:

Working with PCS is easy to do. I call or email with a request, they respond and take care of the request, and we can focus on our business. PCS installed our AVAYA IP Office with voicemail a couple years ago and it has performed as promised. PCS programmed our system the way we requested and networked our Corporate location with our warehouse via Voice-Over-IP.

We count on PCS and have confidence other businesses will feel the same.

Sincerely

---
