To Whom It May Concern:

When we moved into our new facility we wanted to upgrade our telephone system and get a high quality system that was easy to use. We contacted PCS, and Barry Zarembo of PCS helped us get a new AVAYA Partner ACS telephone system at a very affordable price.

The installation process was smooth, they helped us get it programmed the way we wanted, and they trained me & my staff on how to use the system. The service PCS has provided has been great and we have had no issues with the system since its installation. It's a quality system and works well.

We've worked with PCS for several years and can recommend them for business telephone systems & technology.

Sincerely,

Kevin McIntyre
